

## School Fire Drill with demonstration by Firefighters

MGS conducted a fire drill last week where students and staff practised to evacuate the building and gather at the designated assembly place in the school field. The drill was timed and a post mortem conducted to see how the evacuation can be faster and better based on the SOP for fire drills.

Following this drill, the Negeri Sembilan Fire Safety Department conducted a demonstration on the effective use of the fire extinguisher and advice on what to do in the case of a fire.

## From The MGS Transformation Team

Congratulations SPM 2018 students who have achieved impressive exam results across the board. Our grade point average (GPA) of 3.15 compares very favourably with the National GPA of 4.89 and the Negeri Sembilan GPA of 4.67.

A special mention for two top scorers **Kho Huey Wei (10A)**

and **Lee Wenn Shian, (9A+)**

who are among the 411 selected to be interviewed for the government's JPA scholarship.

We would like to thank the teachers and the parents for having so conscientiously supported students in their effort to achieve their best.

You will be seeing changes across the school as we enhance our learning spaces to maximise everyone's potential. As part of this, we are pleased to announce that all secondary students will learn in subject specialist classrooms, equipped with specialist teaching aids and resources.

To achieve this the MPS secondary classes will move into dedicated subject specialist classrooms. For the students this allows them to develop a sense of responsibility, to organise themselves to get to each classroom and gain respect for time management.

This will instantly create a better learning environment as students are immersed into each subject world through colourful noticeboards, literature and resources. Students will also benefit from the refreshing exercise involved in moving from one room to another for their next lesson.

With this collaborative approach, student lockers will be moved to the two glass panelled rotundas near the canteen. This will be more accessible and will reduce the wastage of time going up and down the floors of the schools.

This move will be carried out in March/April holidays. We are determined to constantly improve all aspects of teaching and learning.

## Let's give light and spread love

Teaching our children to share is teaching them compassion and love. In line with this, the MGS Boarding House family started a campaign at the beginning of the year to collect recycled items (books, aluminium tin and clothing) as well as organising a food donation campaign. These have now been donated to the Beautiful Gate Foundation For The Disabled in Seremban.

# SPM 2018 Best Achievers

MPS students are celebrating outstanding results in the 2018 Sijil Pelajaran Malaysia (SPM) examinations. Students did very well across the board and have received the best results for the school, so far.

Here is what our best students had to say about their achievement.

**Kho Huey Wei, 10As**

I have never aimed to score straight As' in my life before because that just seemed impossible for me to achieve. But things changed when I got into Matrix Global School. With the guidance of the teachers and also my friends, I managed to push myself to the best during SPM. Not forgetting my family, they are always supportive of what I do, not just in my studies but also my co-curriculum activities. Without all these people, I wouldn't have achieved my goals. I'm grateful and I will keep my good work up to pursue my dream in the future.

**Lee Wenn Shian, 9A+**

Thank you for the assistance and support given by my parents, friends and teachers. I wouldn't have obtained 9A+ without them. I personally think that time management, determination and hard work are the keys to getting excellent results in SPM. Now, I am studying A levels in KYUEM and I wish to pursue Bachelor of Finance in LSE.

**Caresse Tan, 9As**

I would say that the first step to succeeding in SPM is having the right attitude. Speaking from personal experience, the biggest mistake you can make in exam preparation is over-confidence. Analyse past year papers as well as trial papers from different states, then plan your revision accordingly. As for me, my next step is probably STPM but I intend to keep my options open till then.

**Natasha Voo, 8As**

Success can be determined from so many different points of view. In my case, the two very important keys to my success in SPM are determination and passion. Continuous determination and passion lead me to strive towards my goal. As for my study plan, I don't have a fixed timetable due to my daily schedule with helping my mum with chores. The key would be to pay attention in class and always finish your homework.

I'll be forever thankful to my dear teachers. Without all the immense support from my teachers and parents, I wouldn't be able to achieve such results. My advice is, once you set your goal in life, believe in yourself and never lose hope. Your hardwork will definitely be paid off. Wishing all my dear juniors out there who will be sitting for SPM to always do your best and never give up. Strive to be the best that you can be.

# MIS Secondary Science Day

On Friday 15th March 2019, MIS Secondary celebrated Science Day by conducting and displaying a range of fun and interesting science experiments and investigations to inspire and motivate the students in developing their scientific knowledge and understanding and to appreciate science.

Projects displayed were done during school science lessons over a period of two weeks. The exhibition received very good response from everyone in school.

## Nareesyah (Year 9)

The experiments were interesting as I was exposed to new knowledge and had lots of fun learning science. I understood the concept behind each experiment with the helpful guidance of my teachers.

## Ng Yu Hao (Year 11)

Science Day has been a paradise for die hard fans of science. We were learning new knowledge while having fun! We had first hand experience of how to conduct those experiments instead of watching boring YouTube videos. I personally felt that Science Day has changed students' perspective of science as a whole.

## Scott Choo (Year 11M)

Science Day has triggered a passion for Science in student's heart by allowing them to indulge in a real life experience of mind-blowing experiments. It is a platform for students to combine their knowledge and interests.

## Chestor Yong (Year 11R)

Science Day has been a fun and great day. I really appreciate the effort put in by the teachers and other students. It was a great platform to improve students' presentation skills. Moreover, students who conducted the experiments hands-on will remember and understand the science concept better compared to simply reading about it from the textbook.

## Gentle Reminder:

### MIS to return photo forms

Between Monday 08th April to Thursday 18th of April, students of Matrix International School will be having their annual school photograph taken by professional photographers, Inifim Photography.

We wish to remind parents and students to return the completed order form to the Classroom/Form teacher by Monday 25th March. Please note, payment should be made directly to Inifim Photography by bank transfer using the details in the form provided.
